Miguel André Leal Santos

Date of birth: 21/05/2006 | Place of birth: Leiria, Portugal | Gender: Male | Nationality: Portuguese | Mobile phone: +351 916692279 | Email address: cakephone@proton.me | ID: 305977741ZX9 | Work permit: Portugal | Home address: Rua do Marãozinho, N670, Lufrei, 4600-681, Amarante (Portugal)

Language Skills

- **Portuguese**: Mother tongue
- **English**
  - Listening: C2
  - Reading: C2
  - Spoken production: C2
  - Spoken interaction: C2
  - Writing: C2

Skills

- Programação em C.
- Inteligência Artificial
- HTML , CSS e JavaScript
- Frontend (Vue, Svelte, React)
- Python

Work experience

Full-Stack Developer

29/07/2025 - 30/08/2025

Certibid | Porto, Portugal

I helped, unpaid, in the development of both the UI/UX and the Backend, notoriously:

- Maintenance and development of a SQLite/PostgresSQL Database System on Django in both production and development environments.
- Maintenance, development and improvement of diverse components throughout the Web Interface.
- Implemented payments with EasyPay.
- Learned how to deploy apps/services on Digital Ocean.
- Learned how to use Docker.
- Learned Django.
- Honed my skills in React, NextJS, TailwindCSS and Python.

Overall, I brought a due speed up to the development cycle as funds ran low.

Frontend Developer

01/07/2024 - 10/09/2024

Everthorn

Contributed to Everthorn's website, a Minecraft Bedrock Edition server with custom plugins and integrations with Discord.

While contributing to Everthorn:

- I learned NextJS and React.
- Understood API interactions between frontend, backend code and services like the Discord API.
- Honed on my UI/UX designing skills.
- Networked and became a good friend with the core developer.

My experience at Everthorn was a stepping stone for my journey as a Software Engineer.

Education & Training

Licenciatura de Engenharia Informática

01/09/2024 - Current

Universidade do Minho | Braga, Portugal

Level in EQF: 6 | **Website:** https://uminho.pt/

Secundário

01/09/2021 - 01/06/2024

Escola Secundária de Amarante | Amarante, Portugal

Field(s) of study: Ciências e Tecnologias | **Final grade:** 18/20 | **Level in EQF:** 3 | **Website:** http://esamarante.edu.pt/

Hobbies and Interests

Gaming

I love experiencing different worlds, their stories, economies, strategies, etc. Gaming is one of my favorite ways to do so and I love RPGs (Role Playing Games), specifically Cyberpunk 2077. When I'm not out and about trying to immerse myself, I blast out into the first person shooter games to keep my reactions and quick thinking under pressure on point, my favorite games are: Counter-Strike 2 and Overwatch.

OS Configuration

I hone my skills in diverse other niche languages and utilities through my tinkering in different Operating Systems, primarily GNU/Linux, specifically Arch Linux. For this, I prioritize creating the best, out of the way, batteries included configurations that fit my taste. My Arch Linux configuration is in constant development and optimization for the maximum available screen area by the main application, keeping relevant information from the status bar off to the side and away from distracting me.

This configuration is freely available for third parties in my GitHub profile.

Honours and Awards

Bugsbyte 2026 - Uphold Theme Winner: Geisha Gains

15/02/2026

CESIUM

From the 13th to 15th of February I applied my work experience and leadership to increment fast over a Web App that arbitrates crypto exchanges, the theme/challenge provided by Uphold during this event. In this event, me and my team, Coffee Driven Development:

- Implemented a Brutalist, AI-driven and instructive UI that features news, strategy configuration and confidence levels to exchanges that power the user to confidently profit.
- Learned and improved the use of prompt engineering throughout the development cycle, both for the code itself and various AI system prompts for the different interactions.
- Applied learned skills from a previous workshop provided by Uphold themselves.
- Applied knowledge in NextJS, React, SQL and other frontend technologies.
- Networked with nearby teams and participated in various mini games, which kept the mood light and friendly among teams.

This win couldn't have happened without my amazing team and friends: Coffee Driven Development. A huge thanks to them for providing support and hands on deck.
